DETAILED ACTION

Claims 1-20 are pending in this application. Amended claims 13 and 19 are noted in the amendment dated 6/30/04.

Claim Rejections - 35 USC § 112

Claims 13 and 19 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The newly added limitation of "poise" is deemed new matter as there is no support for such a limitation in the specification as originally filed.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 1, 9, 12-15, and 18, the term "thickfilm" is a relative term which renders the claim indefinite. The term "thickfilm" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would

Application/Control Number: 10/600,600

Art Unit: 1762

not be reasonably apprised of the scope of the invention. There appears to be no clear definition to show what dielectric film thickness is considered to be thick.

Claims 9-10 and 18-19 contain the trademark/trade name KQ dielectric and KQ CL-90-7858. Where a trademark or trade name is used in a claim as a limitation to identify or describe a particular material or product, the claim does not comply with the requirements of 35 U.S.C. 112, second paragraph. See *Ex parte Simpson*, 218 USPQ 1020 (Bd. App. 1982). The claim scope is uncertain since the trademark or trade name cannot be used properly to identify any particular material or product. A trademark or trade name is used to identify a source of goods, and not the goods themselves. Thus, a trademark or trade name does not identify or describe the goods associated with the trademark or trade name. In the present case, the trademark/trade name is used to identify/describe the dielectric coating material and, accordingly, the identification/description is indefinite.

Claims 13 and 19 cite the limitation that the dielectric is thinned to 18.0 +/- 2.0 viscosity. However, the claims do not provide any viscosity units, which render the claims vague and indefinite.

Response to Arguments

Applicant's arguments filed 6/30/04 have been fully considered but they are not persuasive.

Applicant first argues that thickfilm is defined as in Graf's Modern Dictionary for a resistive, dielectric, or conductive paste that is deposited on a substrate by screen printing and thus is not indefinite. In addition, the applicant argues that thick films can be thinner than thin

Application/Control Number: 10/600,600

Art Unit: 1762

film and that it is an commonly understood industry term having sufficiently clear and definite meaning (paragraph bridging pp.7-8).

The examiner disagrees. It is first noted that the claimed invention does not recite a paste nor screen printing. Secondly, if thick films can be thinner than thin films, what is the point of having the term thick film. Clearly, this makes the term ambiguous. The examiner suggests its deletion.

Applicant next argues that the limitations "KQ dielectric" and "KQ CL-90-7858" are dielectrics having a low loss tangent and dielectric constant" and relies on Heaeus Cermalloy's website. Applicant also argues that the specific limitations are not merely trademarks but has a specific composition (p.8).

The examiner disagrees. It should be noted that websites vary on a daily basis and cannot be relied upon. Along those lines, the composition of many materials are constantly changed as new materials or combinations of materials are discovered. The applicant is requested to recite the composition of the materials instead of their trademarks.

Applicant next argues that or of ordinary skill in the art would recognize the undisclosed units would be Poise (p.10).

The examiner disagrees. Viscosity is measured in a variety of different units. Applicant has not provided any factual evidence that the units have to be Poise and hence, is deemed new matter.

Applicant's arguments have been considered but are not deemed persuasive.

Art Unit: 1762

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**: See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to B. Chen whose telephone number is (571) 272-1417. The examiner can normally be reached on 7:30am - 4:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Shrive Beck can be reached on (571) 272-1415. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
